INFORMATION DISCLOSURE STATEMENT UNDER 37 CFR § 1.56 and 37 CFR § 1.97

Commissioner for Patents Washington, D.C. 20231

Sir:

Submitted herewith on Form PTO-SB/08 is a listing of documents known to Applicants in order to comply with Applicants' duty of disclosure pursuant to 37 CFR 1.56. A copy of each listed document is being submitted to comply with the provisions of 37 CFR 1.97 and 1.98.

The submission of any document herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicants do not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a <u>prima facie</u> prior art reference against the claims of the present application.

TIMING OF THE DISCLOSURE

The instant Information Disclosure Statement is believed to be filed in accordance with 37 C.F.R. 1.97(b), prior to the mailing date of a first Office Action on the merits (first scenario). If that is not the case, such as in a second scenario in which a first Office Action on the merits has been mailed before the filing of the instant Information Disclosure Statement, then either a certification or fee is required, and a certification is provided below. If neither of the first or second scenarios is the case, such as if a final Office Action or a notice of allowance has been mailed by the PTO (third scenario), then both a certification and fee are required, and in that case a certification is provided below and also the PTO is authorized to obtain the necessary fee to have the instant IDS considered, from Foley & Lardner Deposit Account #19-0741.

CERTIFICATION

The undersigned hereby certifies in accordance with 37 C.F.R. §1.97(e)(1) that items of information A3 and A4 listed on the Form PTO-SB08 included with this Information Disclosure Statement were first cited in a communication from a foreign patent office in a counterpart foreign application not more than three (3) months prior to the filing of this Statement. Items of information A1 and A2 are U.S. patents that are counterparts to items of information A3 and A4.

RELEVANCE OF EACH DOCUMENT

A translation of a portion of a Japanese Office Action that issued October 22, 2002 with respect to a counterpart Japanese patent application is provided below.

"Claims 1 to 9 Cited Literature 1

Claims 10 to 13 Cited Literature 1 to 2

Remarks (Regarding Claims 1 to 9)

Described in Cited Literature 1 is the fact that, letting N be the number of sensor arrays, image information is read by setting even intervals between sensor arrays such that there are intervals 1, 2, ..., N-1 in an N surplus system, and by skipping an interval of N lines in the secondary scan direction. (Specifically, refer to paragraph {0025}.)

Thus, if the number of sensor arrays is 3, a person skilled in the art could easily conceive, for example, of setting the even intervals between sensor arrays at 4, and of reading the image information by skipping an interval of 3 lines in the secondary scan direction.

(Regarding Claim 10)

Described in Cited Literature 2 is the fact that, in an image reading device having six sensor lines, reading of the same reading position is duplicated by reading the image present at position 1 of document surface at time T1, and then reading the image present at position 4 of document surface at time T2. (Specifically, refer to paragraphs {0055} to {0059}.)

(Regarding Claims 11 to 13)

Described in Cited Literature 2 is the fact that the reading order of the image data is adjusted by having an A/D conversion circuit and an image memory. (Specifically, refer to paragraphs {0047} to {0054}.)

Also described in Cited Literature 2 is the fact that RGB gain values are adjusted. (Specifically, refer to paragraph {0068}.)

List of Cited Literature, etc.

- 1. Japanese Unexamined Patent Application Publication No. H09-163100
- 2. Japanese Unexamined Patent Application Publication No. H10-178513"

Applicant's statements regarding the Japanese Office Action are based on a partial translation that Applicant's representative obtained. These statements should in no way be considered as an agreement by Applicants with, or an admission of, which is asserted in the Japanese Office Action.

Applicants respectfully request that the listed documents be considered by the Examiner and formally be made of record in the present application and that an initialed copy of Form-SB08 be returned in accordance with MPEP §609.

Respectfully submitted,

Registration No. 38,819
